-

So I quit and then the others gradually one after another quit so that now Dr. Newman is about the only one who goes. Which I think is very unfortunate. I think that was one innovation I introduced there that I think was excellent. We kept it up for 35 years with the faculty always attending. Air But then we decided to take the roll. We took the roll in chapel and to our surprise one of the finest chaps in our entering class we found after 3 or 4 days he'd never been in chapel. I spoke to him about it and after that he came. It just showed the value of the roll. I k think those chapel services were a great part of our training then. I'm glad I introduced that. As far as I know they never have that at Westminster. As far as I know they ai atelogo beaelle ent to moitmisla. just have the short chapel services when like they did when I was there. We developed outgotical(use of compound sentences) and repotition public speaking in practical things within a brief amount of time in the whole course Hebres lends itself to source unalysis. He meint ins that but we developed them way beyond what they were at Westminster before or are since carpionals natural to the Hebrew for the purpose of embesia as far as I've ever heard.

I was very thankful for those years. Now I'd better not get into the start of the ACCC and some of those important developments. I think we'd better stop for now.
