

ferent way of putting things, but he said, I spent three years, it was godly, it was wonderful. He said, I wouldn't believe that such a things could have happened, He said, it can be expressed in a different way, but if you get what they mean it is perfectly alright, and the sons ~~were~~ went to Harvard, and there their faith was turned away, and their faith was destroyed, and they came back to preach unbelief, And some of saw how Harvard had gone, and they went to Yale, and at Yale, 100 years ago, they were receiving wonderful teaching, true to the Word of God, standing for God's word. Oh, too bad to leave Harvard, the greatest, the first, the most scholarly ~~school~~ school, and go to Yale. Too bad, he said, but at Yale they were getting teaching true to the Word. Then the unbelief came into Yale, and all through New England there were ministers trained at Harvard, and their churches had turned Unitarian, and they were denying the deity of Christ, but there were these fine churches all over New England with Yale Graduates preaching the word of God, and these men graduated from Yale, and continued preaching, and then the unbelief came into Yale, and they began denying the Word of God, and tearing the truth of God to ~~pieces~~ pieces, and the minister said, Oh, I want my son to go to Yale. He said, I know how Harvard went...13½...he said, Yale is the school where you get the true Word of God. That's where I had these wonderful blessings. I remember that wonderful fellowship with those professors in Yale. I don't care what anybody says about that school. It cannot be true. God....so much power.....13½.... And they sent their sons, and advised people to go to Yale,, and they go and get their faith torn to pieces, get their ~~belief~~ belief in Christ taken away, and they go to their churches, ~~and~~ and they preach unbelief, and the crowds dwindle off, ~~and~~ and the people lose interest in the Word of God, and New England, which was founded by people who came over here to a place where they could worship God, according to the dictates of their conscience, New England which used to be considered as the very center of Bible Christianity, today is one of the deadest places of the United States, where you can go to town after town and find no gospel preaching, and not even a church that is open because of the way this process has gone on. And it has gone on in institution after institution
