

facing a terrible menace to the world. Now many people think oh my, we'd better surrender, suppose they get control of us, what'll happen to the (9 3/4)

I think Dr. Schwartz brought out a very important thing on it. They are not against individuals because the individuals oppose them, they are against the individuals because the individuals are connected with the capitalist system. In Russia anybody who would own as much as two cows was considered a wealthy landlord and 25 million of them were liquidated ~~victims~~ by Stalin for no other offense but that. It is not what your views are but what your background is. They recognize that some of that's in you, you can't get away from the free enterprise in which you have been brought up. When they took over China, when they got control of Shanghai, many a business man in Shanghai said, well it's coming, it's the wave of the future, there's nothing we can do about it, let's stand for it, and so they said we're for you and they gave them the word they were with them, and most of those men, within a year had been liquidated. Men who had declared that they were for the Communists, that they thought it was a wonderful thing and they were glad to work with this new regime, a year later found themselves denounced as exploiters, and all sorts of things made up in order to get rid of them, in order to cause them (11) not for their views but for the fact that they were not members of the proletariat. In America we have hardly any proletariat, in America it would be a slow process, but it is the process which they have in mind. Now will we get bombs dropping on us pretty soon, personally I don't think there's a chance of it in the world, they don't want <sup>our factories</sup> ~~us~~ ~~practi-~~ ~~cally~~ destroyed, they want <sup>them</sup> ~~us~~ in good condition. They don't want our cities destroyed, they want them in working order, they're not going to drop bombs here unless that's the last, the only possibility of keeping us from conquering them, that's the only reason they would drop any bombs here. They don't want to drop bombs here, <sup>what</sup> ~~but~~ they want is to get control of the world and Dr. Schwarz shows their plan, they've been reaching out, taking in more and more of the world, reaching out, and if they can take little by little by little by little, then when they have everything else there are plenty of people here to recommend surrender, and they wouldn't have to drop any bombs, but meantime the bomb is the scare to make us give in a little, give in a little, give in on this, give in
