

But when it came to ... if you are able to number them, of course, they could count them. If you would ask me if I could count stars... you will find out that what God said to Abraham three thousands years ago ^{showed a} ~~shows the~~ knowledge of the heavens that declare the glory of God that no man on earth ~~on earth--~~ had any concept of until five hundred years ago. And the concept that they had hundreds of years ago was the tiniest fraction of what they ~~knew long ago--~~ know today. Because now they know that there are ~~at least--~~ actually as you see with the telescope which was invented only ~~but--~~ about five years ago, you see millions of \surd stars in this one galaxy in which we are, and within the last fifty years they have discovered that they ~~re~~ are millions of other galaxies, and so if you are able to number ~~the~~ stars, which may ~~seem~~ have sounded rather like a silly statement to Abraham, but he took it on faith. Now, the scientists have learned that we cannot number the stars, that they are beyond our number. And this statement that God has made shows the greatness of God ^{in the way} ~~that~~ Abraham could ~~have never~~ have ever dreamed of ... ^{The most wondrous--erous thing about the} ~~no wonder--...-about~~ . Bible is that the more our knowledge advances, ~~the~~ more true we find the statements of the Bible. And if hundred years ago, the heavens declare the glory of God, ~~because--~~ because they look so beautiful , so ~~is~~ tremendous, and so majestic, but today we hardly notice it, because of our artificial lights that blind us and ^{these little ...} with ~~this little~~ ... the greatness of the things that God has made for us ... Yes, today when we ~~discover what--~~ find out what has been discovered by science, we see that the heavens are declaring the glory of God in a way \surd far beyond what Abraham or even the Psalmist dreamed of, and ~~then--~~ when ^{first} (440) the Russians/sent man to ~~of~~ the orbit, Khrushchev asked him after he came ^{any} back, you were up there in space, did you see ~~God~~ there? He said, no, he did not see any god there. Khrushchev said, There is no god, ~~and man--~~
