

If we are to follow the Lord, we have to study the Word and just to see what they mean. We have to see whether it is correctly translated, whether it~~is~~ has been correctly passed on. We have to compare scripture with scripture. We may misunderstand, and there are many things that we cannot understand. When we find what something really says in the Scripture ~~we~~ we can stand upon it. 'Because that is God's word. And we know that it is true. And ~~of~~ God wants us in our life to direct them in accordance of His Word, which is the only source of knowledge to direct them in accordance of His word. This is the only source of knowledge about these things. You know, sometimes, I think that many of our philosophies are like a group of people who let us say have never been to Europe, and never talked with anybody who had ever been there, never read a book ~~about~~ or anything about Europe, and never talked with anybody who had been there, never ~~read~~ read any book that says anything about Europe, and suppose there is no book to get such an information. But suppose they went up to a high hill here somewhere. I do not know where you will find the high hill or along the Atlantic coast here. But suppose they 've got up to a certain high hill somewhere. And they sit on the top of the high hill, and they look out the ocean there, and they see the water, they see the waves, they see cloudes in the distance, they look up to stars perhaps. Is there any country over the other side? Or is ~~this~~ this the end of the world? And one looks at the clouds and he makes a good argument that there is a country over there. Another one looks at the ... a good argument that there is no country over there. And they argue back and forth. And then somebody says, if there is a country, what kind of a country is this? What language do they speak ^{from}ing? Do the ~~rivers~~ ~~rivers~~ - rivers flow ~~to~~ to the north or south like the Mississippi? Or ~~does it~~ do they flow from south to north like the Nile? Do they from west to east like Amazon? What direction do they flow? Is the mountain flat? You could ask the thousand questions and these philosophers ^{could} argue and could show
