

moulding him with his hands out of the clay rather than simply pronouncing the word or ? the idea." That's what he says you find in Gen. 2. He says look at Gen. 2:7, "And the Lord God formed man out of the dust of the ground and breathed . . . and man became a living soul." Does that sound to you as though God created man by moulding him. with his hands out of the clay? Nothing of the kind. God formed man out of the dust of the ground and breathed into his nostrils the breath of life and man became a living soul.' He says this is very primitive. Compared with the exalted late teaching of ch. 1 which says so God created man in His own image, in the image of God created he him!

Why don't these two fit together perfectly? What's the contradiction in them? One says God created man. The other says God formed man out of the dust of the ground. Neither of them says He moulded him out of clay with His hands! That's the way the enemies of the Scripture take passages out of it and twist them and distort them in order to make it appear the Bible is something other than it is.

I could not help thinking last night as I heard Dr. McIntire give that marvelous address about his experiences last week, I could not help thinking, Suppose there was another world exactly like this one. Except that it was c. 150-200 yrs. behind this one. In other words, the other world is just exactly like this one was 150 years ago. Suppose somebody from that world were to hear the talk Dr. McIntire gave last night. Lewis and Clark might have just returned from their expedition which they made 150 yrs. ago when they left the east coast, went clear out to the Pacific ocean, came back. It took them c. a year and a half to do it. Suppose that man heard Dr. McIntire say he left here Monday night and explain all the difficulties he had. He was in Denver Tuesday. He left there Tues. night and was in Los Angeles Wednesday. He went up to Seattle and back to Los Angeles and then the day before yesterday he was in Los Angeles in the a.m. and got a plane for Dallas and instead of getting out at Dallas he just stayed on and got to Philadelphia!

Telling that to a man 150 yrs. ago he would say, What utter delirium, what nonsense! Why it takes months to go out there! How could someone start at Los Angeles in the a.m. and be here at night. What nonsense! But we don't even marvel at it any more because there are principles and possibilities God has created in this universe that men 150 yrs. ago never dreamed of.

Let me tell you the things that man has discovered about creation are not a fraction of what there is in God creation that man has never found out yet. Dr. McIntire did not explain to us how the wings operate on the airplane; how the engine works; how it was possible to make this trip. He just gave the facts. If the Bible gave a full explanation of everything it said, it would have to be as long as many encyclopedias instead of the length it is. But the Bible is the Word of God and carefully studied to see exactly what it teaches, we can depend upon because it is true.

About 600 yrs. ago a man in Venice was thrown into prison. There he got to talking to another man. This other man liked to write. Printing had not yet been invented in Europe, though it was already in use in China. This man in prison as he talked to this other man as time hung heavy on their hands, began to tell him some stories about experiences he'd had in a trip he'd made over into China. He had spent some months in China. The other man became so interested he said Would you mind talking a little slower and letting me write this down? He said, Alright. So Marco Polo dictated and account of his travels to and from
