

Planning and scheming and training their leaders for the time they were sure was coming when they would take over all of China! So when at the end of the war they were able to take over all of China the evidence is tremendous in its amount if people would only read it showing that how cleverly they worked. They got control and they were friendly with people They did not want to hurt any people, just the ones who had been fighting against them. But the thing is they've got to find out who the people are who are against them and if you are a friend of one of these you had better tell them about it, you had better bring in a report of it because if you don't and they find that out you're in trouble.

The result was that some came forward to tell about others who had been opposing communism and then they killed the others and then they killed these. They say that between 10 and 20 million Chinese were massacred in those first few years, but it was done so cleverly that everyone thought that he personally would be able to escape from it. So they took first one level, and then another level, then another level, and so on step by step in this way. Before long the idea was not, Is this man anti-communist? That wasn't their primary objective. To get rid of anti-communists. The question was, Here is a man who was --who has not been out vigorously working for communism, does he have any leadership quality? If he does, he can be a source of danger to us in the future. Get rid of him! So they took everyone who was not actively working for communism that they thought had any kind of leadership quality, and they found one excuse after another to get rid of (liquidate) them. And when you thought that everyone who could oppose communism had been removed from the country and they had control for almost 20 years, and you would think that now surely they would not have to do any more of that. Just in the last few months a new tremendous purge has been begun. To be sure to get everyone who could possibly be a center of opposition to the complete control of the communists. Anyone who still has anything in their minds that comes from the old Chinese regime.

Drew Pearson in one of his articles, in unconscious irony, it's sure it was unconscious, mentioned how much more kindly the Chinese communists are now than the early Chinese communists were! He said, in this recent purge the President of Peking University was not liquidated or tortured! He has merely been made a street sweeper! He mentioned ~~xxxxxx~~ the presidents of three of the leading universities of China who were now reduced to unskilled labor, after having occupied that important position for 10 or 20 years under communism's auspices and doubtless having done the best they could to please the communists. But they want to get rid of everyone who is not 100% under their control. When we look at our country and see people burning draft cards, and talk as though America was brutal because we go in there to try to protect the freedom of those people, and when you see the extent of the propaganda in this country, and to give you a realization that is hard to believe how far the force of communist propaganda reaches, and how far our people are affected by it.

Take a man like VP Humphrey, the founder of the ADA, the leading group of liberal propagandists in the country. One of the founders of it, one of the leaders of the liberals. And Mr. Humphrey as VP found it necessary to stand behind the Government and support continued American intervention in Vietnam. When he did that, these liberals who used to look to him as their very leader, have been picketing his meetings, and criticizing him and talking as if he had deserted everything that he
