

the streets throwing rocks in windows, hitting cars with ~~clubs~~ chains, doing all sorts of damage. The police had quite a time coping with them. It is my impression that most of them ~~was~~ managed to get away and return to their homes in different parts of the country without having to ~~take/~~ ^{pay} ~~accept~~ any penalty for their ~~crimes~~ crimes. This was a sudden premeditated display of violence.

We remember a year or so ago when there was the so-called "Tet" attack which Communist-minded publications have represented as if it were a Viet Cong victory. Actually of course it was quite the opposite. People made a straight (?) suicidal effort in one great sudden attack to gain control of South Vietnam. ^{Then} ~~The~~ secured temporarily the control of many of the cities but were eventually repulsed with great loss from every one whom they had taken.

We recall that a number of ~~men~~ ^{Amer°} men--it seems to me is was twenty--forced their way into the ~~Ameri~~ embassy one night, seizing the building, and being well armed, they held off a large number of assailants until eventually they were all killed all were killed and their seizure was brought to an end. Such a thing could happen right here in Phila° if a determined group of men were anxious enough to make their ~~point~~ ^{point} to be willing to be sure of losing their lives. They could seize our City Hall some night and it might take a considerable force to dislodge them.

These people in Vietnam have been willing to do this because they have been stirred up to such ~~an~~ fanaticism that they are ready to give forfeit their lives in fighting against what they consider a terrible enemy. It is not difficult to work people up in this way if a sufficient amount of propoganda is ~~is~~ used. We see how some of our young instructors and psychologists have brainwashed the young people to the extent that many of them have done very foolish things in the last two or three years. I
