

Once the Communists had complete possession of the world it might be a quite different and situation./ There might then be a rapid descent into weakness /to the end of civilization /~~civilization~~.

The evidence as to the true ~~z~~ attitude of the Communist leaders is perfectly clear in our papers and magazines. The facts are all there, and yet seems as if very little attention is paid to them. The emphasis is all the other way, and great numbers of the people are ~~xxxx~~ brainwashed. The latest issue of ~~Xi~~ TIME magazine has a number of letters from readers telling how terrible shocked they are at what they call the massacre by the Amer° soldiers and how barbaric the Amer° soldiers are. I do not remember seeing ~~xxxx~~ any such deluge of letters telling what they thought ~~of~~ about the ~~xxxxxxxxxxxx~~ assassination of several thousand civilians by the Communists in Hue. These things on the part of the Communists are commonplace, These things are commonplace on the part of the Communists, but let a few Americans lose their head heads and they get all excited ~~about~~ about it and try to represent that the Americans are the barbarians. Yet the facts are absolutely clear as to the attitude of the Communists.

I remember back in the days before the US° got into World War II, there was a newspaper published in NY° called P.M. by a man named Ingersoll. He was a fery strong leftist. He told in the magazine ~~how~~ how he made a trip to Russia and talked with Stalin, and how he tried to convince Stalin that actually Roosevelt was very friendly to the Russians, that we were anxious that the Russians should not be defeated the Germans, ~~I~~ in fact, that T ° might even bring the US° into the war on the side of the Russians. There in the course of his article he mentioned ~~what~~ how Stalin had been hesitant about believing him. He said that Stalin said, "You say R° is really friendly to us? How can I believe that? After all, deeds speak louder than words. Lindbergh and others are boing about the US° urging that the country preserve its isolation and not take a part in this war. Now," he said, "if R° ~~is~~ really favors us surely he would have these men shot rather than allow them to carry on progaganda this way." Evidently Ing° did not realize what a revelation this was of the attitude of Communist~~s~~ as compared with the freedom that we enjoy
