

5000, many of them with terrible torture, most of them for nothing excepting not heeding communism! Not for being against communism, but for having some leadership ability which might make them a menace to them, and therefore they had to be destroyed. But did you hear a big protest demonstration in the country for what the N. Vietnamese did in Hanoi? Have you heard of great demonstrations against the atrocities the communists are carrying out? You don't hear it. They don't have it, because the darkness is reaching out. The darkness is taking hold on people's minds. The darkness is causing people to have utterly distorted ideas and attitudes. It is mighty hard when the darkness ~~xxx~~ gets into people's minds and into people's attitudes. It is mighty hard in a brief time to change them. You have to bring the light to deal with the misunderstandings, to correct the false impressions. Above all you have to get them to know the person who truly is the light and in whom there is no darkness.

When I graduated from college I went to Princeton Seminary and after a couple of years ~~a~~ I went back and I met this professor that I mentioned to you. He ^{introduced} ~~introduced~~ me to his new assistant who had just come from Union Theo. Seminary. He said to him, "I think of MacRae as sort of a lost soul! He was under my teaching 4 years and he is still a fundamentalist!" He had a way about him that just won people, and got under their skin, and led them to take his attitude. I remember when the war started in Europe and this professor was dead against it. This imperialist war, why should we get stuck in this imperialist war? Then when German and ~~Russia~~ Russia began to fight he had an article in the New Republic Magazine. In this article he said, "I have been against this as an imperialist war until now, but now that Russia is being attacked, it's time we got into the war!"
