

institution anywhere. I know it is greater than the average teaching ability of any institution where I have ever studied, and I have studied at ~~some~~ some of the finest universities in ~~American~~ ~~the world~~ America and in ~~the~~ Europe. Far better than this, every member of our faculty is absolutely consecrated to the Word of God, and to the great ideals set forth in our Charter. charter. Every one of them is ready, uncompromisingly, ~~to~~ to stand for God's truth, and ~~is~~ is anxious to train men who will have the tools and the equipment to study the Word of God, to find exactly what it means, and then to go out, facing whatever ~~criticism~~ criticism may come to them from others, but looking to the LJC^o and to Him alone for their leader.

Sometimes I look back with nostalgia to those early pioneering days. I worked very hard in those days. At the end of the first year of the seminary I was ~~also~~ absolutely exhausted. It was a tough struggle. There were disappointments. There were problems. There were difficulties. It was real ~~work~~ pioneering work, but God gave us strength and gave us wisdom, and above all taught us wonderful lessons of trusting Him and looking to Him for leadership in all that we did. Oh, O, may God enable us to continue the same spirit and the same outlook that we had when the seminary began. We may not have to ~~face~~ face the privations and the disappointments, the problems of pioneering, but may God enable us to use all the facilities He has given us for His glory, to put Him first on every point, to look to no human being, but to the LJC^o as our leader, and to follow Him and His work until He comes.
