Higher Criticism #4

Copernican (?)

decided to be the very latest document. This Copernicum revolution, ^{documentayr} documentary ~~the~~ "Copernicum Revolution," as it was called, brought the document theory in line with current ideas of the evolution of religion. Hardly any of the older scholars in Germany accepted it, but the younger scholars were simply swept away by it and it came to be taught in Germany, in France, in England, and in America. Over the years it gradually was spread ~~more~~ more and more widely until today it is taught in just about every school, except out-and-out ~~xxx~~ ~~Chn° school~~ schools, that teaches anything about the OT.
