

in his palace and ~~s~~ looks at a map and said, Build the city here , and they had to go and build a city where he said. Was that the kind of man Solomon was. Not if Christ is correct when he ~~se-~~ speaks of the ~~s~~wisdom of Solomon and a greater than Solomon is here. I heard an interesting story some years ago. ~~As~~ I attended Occidental College in Los Angeles in my undergraduate work and ~~Of~~ Occidental College received a ~~fari~~ fair amount of money from Andrew Carnegie, who was a very great steel man, ~~had a very great--~~ a very expert man in many lines but probably did not know a great deal about education. And Andrew Carnegie gave a very sizable sum of money to Occidental and there was another college about 40 miles inland from Occidental called Parmona, and the ~~pred-~~ president of Parmona College ~~did~~ decided he would see if Andrew Carnegie wouldn't give him some money too. And so he went to Carnegie and asked him if he would give him some money, and Carnegie said, Well, look here at the map, here's Occidental College, I've given them money, and on the map of the U.S. Parmona looked as if it were almost touching it, about 40 miles west of there. He said Why did you put your college here, since it is so near Occidental, and he put his finger in the middle ~~fe~~ of the _____ desert where you ~~g~~ could go a hundred miles without finding a well or a house. Well, ~~thee~~ there was a powerful man who just on a superficial basis said Build ~~hi~~ it here, but of course, if he ~~ke~~ knew the facts in the situation he would know that in a great center of population such as around near Occidental where you will find 10 or fifteen colleges within a hundred miles , it would be much more sensible than in land where it was just desert. Well, was Solomon that sort of man. Well, ~~Quick's~~ questions were ~~incre-~~ increased there when he began to excavate , because they began to excavate and there they had a very disturbing experience. They had ~~had~~ hardly begun to dig into the mound
