

the people
what sort of a land is it. What ~~x~~ kind of language do ~~they~~ speak? In what
direction ~~x~~ do the rivers run. Do they run ^{from} north and south like the Mississippi,
or from south to north like the Nile, or ~~w~~ from West to ~~E~~East like the Amazon.
We could ask a thousand questions and they could show most wonderful intelligence
in the way that they discussed various possibilities. However, unless they either
crossed the Pacific or ~~x~~ talked to someone who had crossed, or read what was
written by someone who had crossed, it would be absolutely impossible for them
to have any sure knowledge ~~o~~ as to what was on the other side. The only way
to get this information would be to get a revelation from ~~some~~ someone who
had been there.

This is true of a great many of the most important things in life. They
deal with facts to which we have no access. We must get a communication
about them from some person who knows the facts. The most important things
in life cannot be known to any human being, ~~x~~ only God can know the answer
to ~~th~~ them. The Christian claim is that He has given a revelation in ~~the~~ the
Bible through we can get this answer.
