

from Russia or China. It is the result of a home grown American reaction against Christianity which is showing itself in this economic system and ~~which~~ which will result in humanly speaking means the downfall of the material values we have had.

Now it God's will for us that we show our love for Him by standing for Him in the midst of such a situation. But I believe we should make our voice heard and do what we can in favor of those things which have in developing this which we have. I've heard it said, Isn't it terrible; one-sixth of the people of the world are in the U.S.A. And this one-sixth consumes one-half of what is produced in the world!" Then I saw this statement put in its proper perspective. One-sixth of the people of the world are in the U.S.A and this one-sixth is producing one-half of what is produced in the world. (what's consumed (?) by the world). That's the situation we have. In the Russian system they have to buy grain from us. Under the China system they have to buy grain from us. These other systems do not work.

Now there is great talk against the Prime Minister of India. Indira Ghandi has done away with democracy to a large extent. But what is less noticed is that she to quite an extent has gone back upon the things she has been talking of all these years of government control of everything and is giving more freedom in the economic system. The result has been that in the last 6 months India has improved economically more than in any two years before because she has gone back on what she taught but perhaps her reason for a democracy is that she knew that the people would not stand for such a on her part.

Let us keep our eyes on the Lord. Let us keep our eyes on His Word. Let us realize that one soul that lives for all eternity is more important than any nation on earth. But O let us remember that we do have a duty to the nations on earth. And our duty is to try to preserve the values that have made America what it is and to try to turn back the toward what is good in these attitudes. Back from the tremendous progress that we have made in the opposite direction. And to try to bring to these other nations not simply that they should on top, but to bring them to them the type of system that under God was established with the ability that has been characteristic of our nation ever since its

Our Father we thank you for your word. That it has the answer for all that is vital. We thank you that we know that human and plans cannot accomplish, cannot build a perfect world, but can only tear down the individual. We thank you that the blessing of God has so on this nation. We can praise you for these 200 yrs. of progress. And O our God we see our country moving in the opposite direction. We see it has moved a long way. O our God bring America back to its Bring it back to giving the Bible the central place in all its and cause our leaders and politicians to see the following of the ~~will~~ will of the wisp of a governmental system that leads only to deterioration and decay, and to put their attention on the primary purposes for which this nation was founded like to protect life and give all its citizens opportunities to pursue happiness. We ask in Jesus' Name. Amen.
