

But it was my impression as Dr. Young talked that he was almost as much affected by another point. That was that his son was not being given any education really. He said they ~~were~~ were practically teaching him nothing in the ~~xxi~~ class, trying to develop attitudes ==what they called attitudes and approaches and ability to get along with other people, and paying little attention to real education.

Within the last two years I heard that the in the State of Florida a great many of the high school graduates could not even read decently. At that time in Wilmington ~~xxxx~~ a woman told me her daughter was in eighth~~xxxx~~ grade and she will read and she comes to a word and she does not know the word and she has no idea how to endeavor to pronounce the word, absolutely no idea. This so-called progressive education was the bane of the educating of our people along with growing anti-Christian attitudes.

I knew a woman in San Bernardino, Calif. about 10 yrs. ago who was disturbed at what the attitudes toward sex were being taught her little children in school. She went and asked to see what was being taught there. She was told it was none of her business. That was the business of the school what they were going to teach. This woman found other women with similar attitudes and they got a committee appointed on which ~~w~~ she was a member, and they secured an order that they must see the materials that were being taught to the children. She said, reading through these children's (materials) she was so utterly disgusted that for years after she had nightmares. Alas she did nothing more about it as far as the school system is concerned but instead took her children out and sent them to a private school. A million homes are I understand today endeavoring to train their children at home in cities or areas where there is no public [private] school, and I was told a year ago that Christian schools were being established about once a year=== about one a day. So many were being established because people felt so keenly that the teaching the children were being compelled to submit to in the institutions and the National Educational Association is endeavoring to get control of all education in the country.

This is one thing === This is the sort of thing that one feels can be a tremendous force in moving our nation even as Egypt in those days to a situation where it knows not Joseph. A situation which can bode very ill for the development of the nation. Under these circumstances it is very important that we give much thought to our duty as Christians and as citizens. Millions of people in this country are gladly paying for two systems of education. They pay taxes for the carrying on the the federally controlled schools, and they pay tuition to have their children in Christian schools. It has always been held by Christian people that the primary responsibility for educating their children rests with the parents. This isa development which I feel is very important that we think about and that we realize that this development of big government is something which in the end moves us along very far in a direction that it is highly questionable whether we ~~w~~ ought to desire the nation to go.

I do feel therefore that this present election is something that is of tremendous importance to the country and that should concern every Christian. Our country has been the greatest contributor to the support of foreign missions throughout the world. Our nation today is a great bulwark of Christianity ~~xxx~~
