

vowel. This seems to be accepted, though difficult
to move
a difficult principle to prove.

The preclitics, having no independent
accent could not retain long vowel. To
move vowel

An important rule.

Pretonic lengthening of ^{syllable with} n - invariably
expressed by lengthening of consonant
rather than of vowel - else the
vowel would have changed to a
but ~~retain~~ lengthening of ^{syllable with} a -
the vowel is lengthened.

limmud not a piel but a kal
formation.

limmud > limud because of dissimilation
u m u. When the m is doubled, as
means of pretonic lengthening.

In amog - is the lengthening
really secondary.
