

Probably colors and infirmities require
doubling of consonant, as in Arabic.

3 three stages or grades of vowel
lengthened Normal reduced

In Arabic - Lengthening is required
for obscure reasons.

Two syllables from the accent, the
vowel is either lengthened or reduced

What is meaning of delayed t ?
a question.

v & β can not be doubled in Greek.

nba ff ι ala does not belong here. It is a case
of double lengthened vowel, not consonant.

hh - six is from $\text{š}^i - d - \underline{t}$

becomes $\text{š}^i - d - \text{š}$ in Heb.

which becomes $\text{p}^i \text{š}^i$
