

p75 not good. ~~better say accent was originally on first syllable, hence would not have been subject to \bar{o}~~
Only in Caananite accented long a

becomes \bar{o} .
a very old ^{principle}, as shown by Amarna letters

zer~~oo~~ and en~~oki~~

In some cases the accent shifts later.

cf. $\text{אֶתְּ} \text{וְאֶתְּ}$ and יִדְ

p75 n not good, at least in case of
iksruhu

Hard to work with Anzepe, except
in poetry.

Nisbe form = relationship term.
an Arabic form.

p76 n preter long vowel shortened
a long vowel immediately before accented long vowel shortened

77 n ~~a~~ cf. Bertrass, p115 Bottom.

Best here to assume first vowel was shortened
by dissimilation
