

795. In T1X] the | was put in
to prevent pronunciation as T^hX]

The milk was from sheep and goats, fermented in a special way, not milk but leben.

It is a very cool, refreshing drink.

V20 Use of T'DY in masc. is strange, esp. in view of 2 following feminines.

Pronunciation of final vowel in open syllable a difficult problem. Very doubtful if they were pronounced.

Did the Massorites have T'DY in mind? or otherwise why did they vocalize as they did? Perhaps a reason unknown to us. It may have preserved something original by a correct tradition.
