

Prophets 10.

the tests of a prophet and you remember he did not say there, "When you see a man whom the Lord has put a purple mark on his left cheek, you know that he is a true prophet and you can trust him." He does not say the Lord will give some sort of a simple indication that way which will make it easy for us to know who are the true prophets and he does not say, "The man who comes of the family of Moses, a direct descendant of Moses, he is a true prophet." He doesn't give any such means as that of telling who is a true prophet, so it makes the problem rather difficult to know just who is the true prophet.
