

start with chap. one. But if you find difficulty in applying this method in chap one. don't worry about it particularly, do the best you can, and when you get to chap two you are ~~xxx~~ after the day of Pentecost, after the time when the Holy Spirit is working in more of His normal fashion for this age.

So from there on we are especially interested. But in the first of Acts, you find just before the actual beginning of the organization ~~xxx~~ which we call the Christian Church you find that Jesus was raised from the dead, walked with the people and discussed certain things with them, and when He left them certain things were discussed. Now these things are surely meant to be important, and so as you go through this chapter you will note what you learn of the doctrines of the early church, but you learn of its type of organization, do you find, in the first chap., that Peter is recognized as the leader, as the infallible pope of the Church, whatever he says is always done. Is that what ~~xxxxxxx~~ you find to be the ~~xx~~ absolute truth here? (end of record)

Record 6 7

~~xxxxxx~~ By Thursday I would like to have you have the first assignment done, which I will post.  
/ And that will be to go through certain chapters and notice certain points that I will mention. Notice them, and indicate the verses that you find something under these heads, and I want you to go straight through the chapter and say that this verse ~~xx~~ tells you about this doctrine, and this verse tells you something about the type of organization, this tells you about leadership, this verse tells you something about its ceremonies. Then you turn back in your loose-leaf book, and you have a page with the heading on for Doctrine, a page for organization, a page for ceremonies, etc. And on that page you put down just the ~~b~~ verses that apply to that head, and then just a very brief statement about what you learned from it, from that verse. And that way, in the end, you will have all the verses on the doctrines of the church put together, all that you will find on its organization, and so on.
