

past, but it shows , it is apt to show the continuous action. It is very interesting that this usage should occur in this way / in the Scripture, particularly now that the evidence from the red shift in the spectrum of <sup>distant</sup>galaxies has led nearly all the scientists to the conclusion that these great . . . all parts of the heavens are moving away from us just as rapidly as possibly, moving away from us at ~~very~~ ~~rapid~~ a very rapid, at an inconceivably rapid rate. The idea of the expanding universe which is so common in the astronomical thought today which <sup>at least</sup> seems / to be suggested by these usages in the Bible. However, we do not find the suggestion in Genesis. All that can, the only reference in Genesis that clearly refers to the creation of the heavenly body is the first verse of the Genesis, where it says that in the beginning God created the heaven and the earth.
