

This is not to say that I feel any irritation at her. If ~~there is any~~ there is any irritation it would be toward Francis for having not let me know that she was expecting him when we would go on talking, ~~ix~~ or when something would occur that needed to be done, and I would suggest that he might do ~~it~~. I do not remember, however, asking him to do things that would keep him late. I think it was more our ~~talk~~ talking together. It is interesting to find this after all these years, and to reach a conclusion that this has affected her ~~xxxx~~ attitude toward me through the years, and indirectly of course, at time can't help affecting his. As I /said, I am not irritated at her about it, only ~~disappointed~~ disappointed and interested to observe this fact.

(nc) Beside the statement she made about his liking my exegesis is very slight compared to the many things we talked of and the mutual influence we had on one another. I have very high regard for the tremendous labor ~~wh~~ she has put in in helping him, the fine associate she has been in his work, and the fine books that she has written, though it was quite a disappointment when I first looked at the book, the strange, ~~xxxx~~ (nc) having been so much closer to him than I ever was to Doug Young, and to find my part in DJoug's preparation given so far more credit in his life story than Edith gave in Francis' ~~xxx~~ story.

Perhaps it might be said that I consider the influence I had on Francis as one of the most worthwhile things in my life. I ~~xx~~ incline to think that if it were not for me Fran would have stayed another year at

had his final year at Westminster and then would have been brought completely ~~x~~ in line with their teaching, which would have I believe one of the most worthwhile aspect of my life ~~xxxx~~ was my influence on Francis Schaeffer. Francis has far more energy than I have, and also far more ability to influence other ~~xx~~ people. He has done a tremendous work. He and Edith both have, and the Lord has greatly blessed their ~~ix~~ efforts, and the influence has gone out world-wide. As I look back ~~x~~ I remember that at Westminster in those days most of the students came around completely to the view which became typical of that institution. ~~M~~ The majority of the students were single in those day. It was either Doug or Francis who said to me that
