quit the attempt to carry on the work and so the Jerusaleum   temples
was not   and the next year Julius was killed and- in the attack upon
the Persians and again there was, and never again was there an attempt made
to rebuild the temple. Jerusaleum had continued to be trodden down first
by the Romans, then the Mohammandens c in 1929, when I was there in
Jerusaleum you could stand up there in that area where the temple had
been. There is a diffinite part of Jerusaleum, a high flat area over
Mohammand   you could stand on it and all around, the houses where the
Jews were coming in and setting down all around outside ow they could
get in this great open space   and no Jew was even allowed to enter that
even five dollars to enter. It was trodden down of the Gentile with
the Jews round about. And I wondered in 1929, how soon will the time when
the Gentiles be opened and the Jews the great numbers of them right
into this area and take it away from.   I was there last time. And now
the Jews cannot even get to the wailing wall which is inside of that temple
area which was still   in war of 1929   a great no mans land
just beyond, a block away from the temple. That no mans land is a block
wide filled with ruins and no one can go out from this side into
and if you enter that no mans land you are   because the lenghh and
bredth of the land of Palestine today and the place of the temple in the
old city of Jerusaleum is $7\frac{1}{2}$ until the time of   and to quote the
skeptical historians   temple to be rebuilt and to quote the prophet
it would be false and gi en A tries to work out a natural explanation of
                    together there and then the
how the gas was   and the taverns under the temple what might have
occured, I don't know but the explanation might be God used

   But the fact seemed to be unquestioned that that happened and Jerusaleum
continued as like today trodden under foot by Gentiles.   While these
                                                   predictions
four instances I gave you are insta ces where ~~senditions~~ are made which
      events
cover ~~edvence~~ in the future that no human being could have possibley
have forseen. And as for predicted in such a way , not in such a way that
we could tell exactly, but in such a way that after it happens, we see the
