

Dr. P. D. Wilson used to say, he said, the Lord said, "God into all the world and preach the gospel," she didn't say to go into all the world and explain all the mysteries of the universe. There's ~~xxx~~ lots of mysteries that we just don't know the answer, and if we should get all the answers we ~~would~~ would-spend-all-the- wouldn't have any time to do any service for the Lord. But whatever we can get, of course, we ~~xxx~~ should get.

(Well, the thing is then, if you recognize that there is a conflict in your own mind, as to how these two might go together, ~~xxx~~ could you truly say or stand up for one or the other as what you feel ~~x~~ is the right interpretation). Well, I feel the interpretation that ^{sees} ~~accepts~~ the one and rejects the other is wrong. I think they are both ~~xxxx~~ ~~x~~ important. And I think that we should stand on both of them. And I have know people who have stood on just the one and not the other and I have felt that there was ~~w~~ something lacking. But I don't know how they go together, and there are many other things that I don't know how they fit together, ~~which~~ which I ~~don~~ accept ~~x~~ both of them. I don't believe there is a real contradiction. I just don't see how they fit ~~g~~ together. (I don't know, I sort of feel that when you know that both of these situations exist, why you certainly can say that maybe ^{feel that} this is ~~how~~ how each of them is spelled out in the Bible. You should always know both circumstances, ^{an} keep ~~them~~-open enough mind to not come to such a ^{complete} ~~conclusion~~ conclusion there could ~~be-some~~ not something else added, ~~ifxx~~ that we haven't got that could straighten it out.) (I don't know, because of the lack of the ~~xxxxxx~~ knowledge that we have or the lack of information that perhaps that God has given. us at this point. There could be more to it and we should always ~~xxx~~ be prepared for this additional). Oh, yes (^{to sway} To allow it in either ~~one~~ direction or another to be compatible). Well, I don't know how to reconcile it, any more than I know ~~wh~~ how to explain how space can be absolutely endless. I can't conceive of an endless space. But I can't say for that reason ^{be convinced} that space doesn't
