

Hebrew word which we translate God and in the other one he was called the Lord God as the authorized version has it, or as ~~the~~ Jehovah God as the Revised Version has it and the name Jehovah or LORD in captials is continued in succeeding chapters with the word "God" no longer used in connection with it. And so they said here you have two parralel accounts two contradictiry storæes of creation and two distinct names of God used in it. And from that beginning, there developed this whole great theory, this complicated theory that you had different strands, different viewpoints brought together and rather uncritically placed one after the other even though they contradict each other. Well now let us look at this fact for a minute. ~~Here is a~~ And it is assumed today to be a fact you will find almost any book that kmentions Genesis written by an unbeliever today will refer to the fact that it starts with two contradictory accounts of creation. And people ask the question How can you reconcile the two different accounts of creation, the two ~~different~~ ^{contradictory} accounts of creation. It is a starting point and a very ~~powerful~~ powerful starting point. And it is easy to say now lets try to explain how they fit together but before ^{that} it is a vital point of scientific approach to ask just what is the fact anyway. Lets look at the facts. How very easy it is for me to ask this question Why is it that all of the men that all of the conductors in the Pennsylvanic Railroad are so courtezous and all those in the Baltimore Ohio Railroad so brupt and you can start in discussing the character of the two railroads and showing what you might expect in one and what you might expect in the other and so on but the sensible thing to do would be to ride on it and see if your experience happened to be the exact ooposite of the other mans who made that statemant. What is the fact . How easy it is to get to discussing why something is before we are sure it is a fact at all. ^uWell now let us look at this for a minute. We are told there is a story of creation in Genesis 1:1 to 2:4 and there is a distinct and contradictory story in Genesis 2:4 to the end of the chapter. Well someone immediately is shocked. He says Look at ~~here~~, Why do you break into the middle of the
